MSData (Full Database) Installation Guide

Msdata can be downloaded in CyberQuote website after logged in.

1) Click MSDATA2.EXE to start the download.

We are proud to introduce MSDATA2.EXE to you, only hkstock and hkindex are included in msdata2. EOD Updater2.0 has to be used to update MSDATA2 data. Both MSDATA2.EXE and EOD Updater2.0 can be downloaded in below download zone.

Free EOD data offer specially for Phillip client, please contact 22776730 for details.

 ii. [EOD Updater Software \(Latest Version v2.0.0.0\)](#)
 Only for Msdata2, NOT FOR MSDATA

The most updated version of EOD Updater:

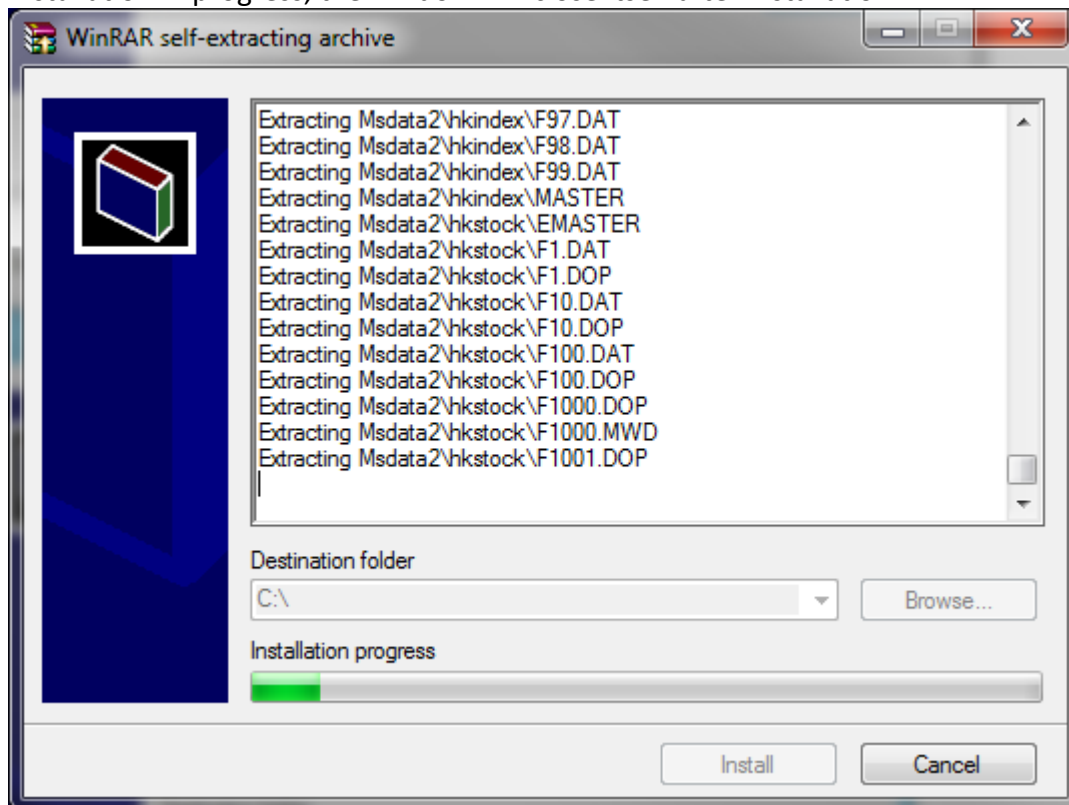

2) You will then find MSData2 downloaded to your desired destination folder, double click on Msdata2.exe to start installation.

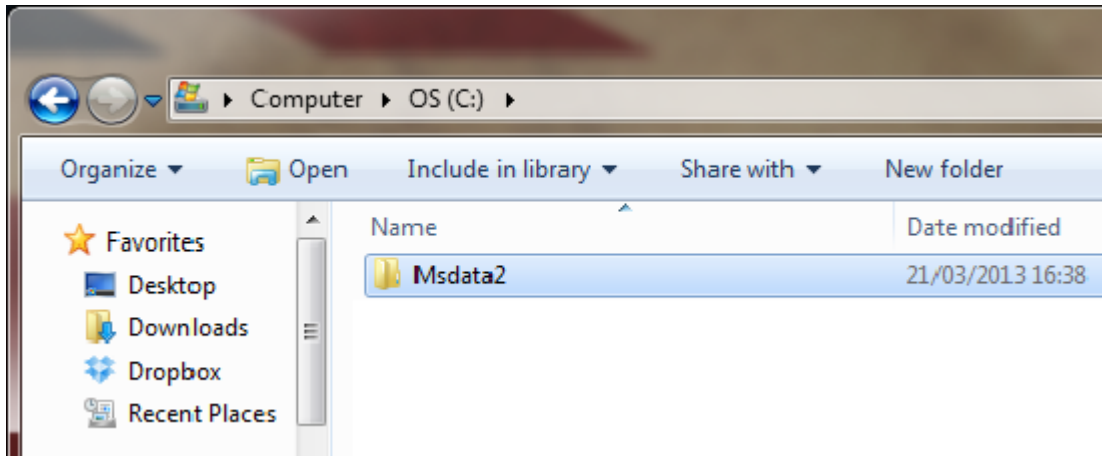

- 3) WinRAR self-extracting archive windows will pop up. Please enter 'C:\' or other drive, or even click 'Browse' to choose your destination folder. Click 'Install' to start installation.

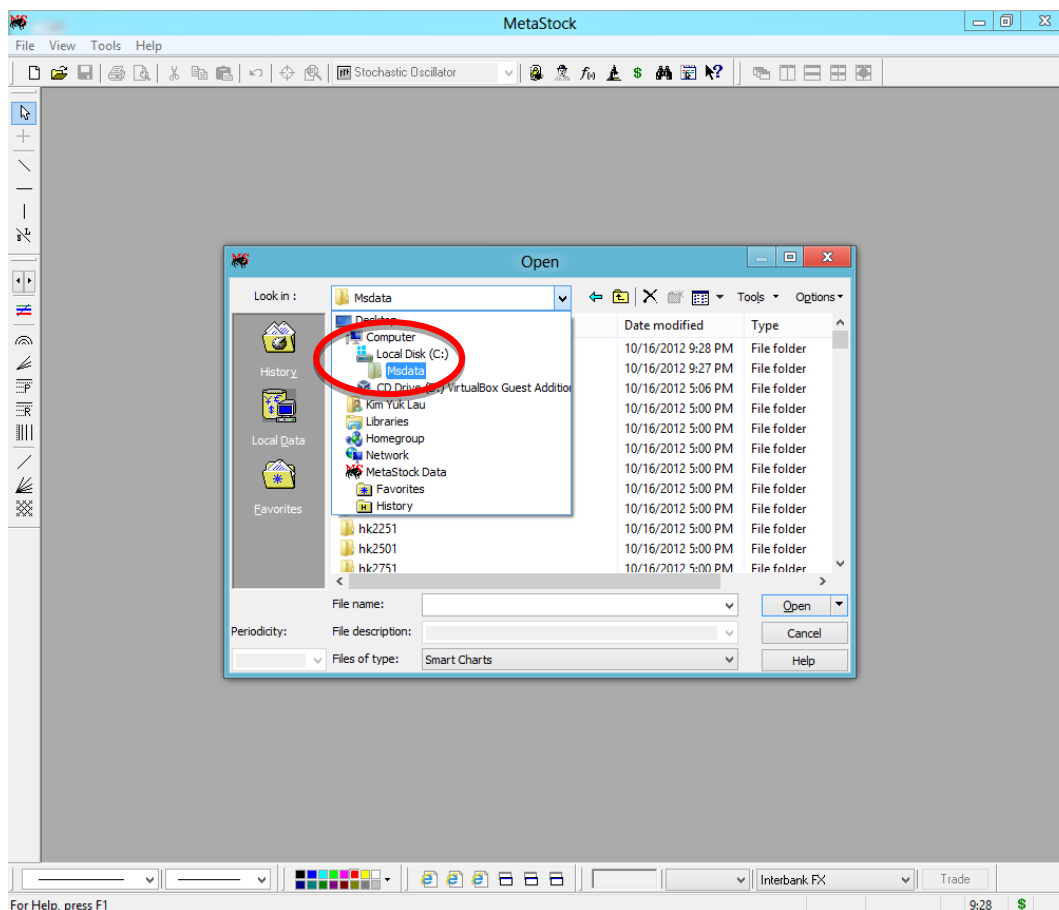

- 4) Installation in progress, the window will close itself after installation.

- 5) After installation, the folder 'Msdata' can be found under 'My Computer' → 'C:\' or under the folder you chose in step 4.

You can now open files in Msdata2 from MetaStock. From MetaStock, click 'File' → 'Open', choose 'C:\' or the folder you chose in step 4 to view all files in Msdata2. Instruments are divided into hkstock and hkindex. Click on the desired stock to open its chart.

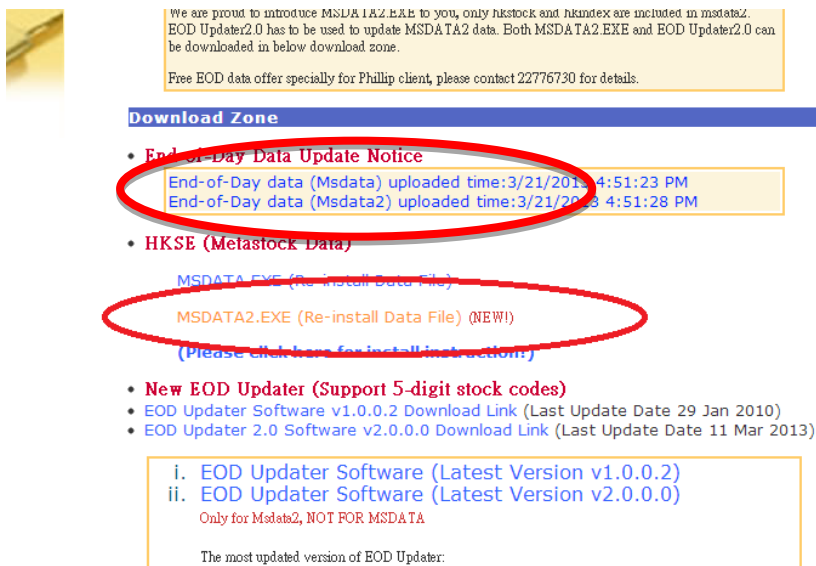

Update directly the MSDATA

CyberQuote provide two ways to update the newest EOD data. The first one is to download the newest MSDATA to replace the existing one. The second method is to use EOD Updater to update the newest daily file to existing Msdata. (For the second method, please refer P.x)

To update data with the first method, please download the latest Msdata2.exe in CyberQuote website after logged in.

- 1) Click MSDATA2.EXE to start the download. (Uploaded time can be found in Update Notice)

We are proud to introduce MSDATA2.EXE to you, only hkstock and hkindex are included in msdata2. EOD Updater2.0 has to be used to update MSDATA2 data. Both MSDATA2.EXE and EOD Updater2.0 can be downloaded in below download zone.

- 1) After download, you will find EODUpdater2 in the destination folder, double click on it to start installation.

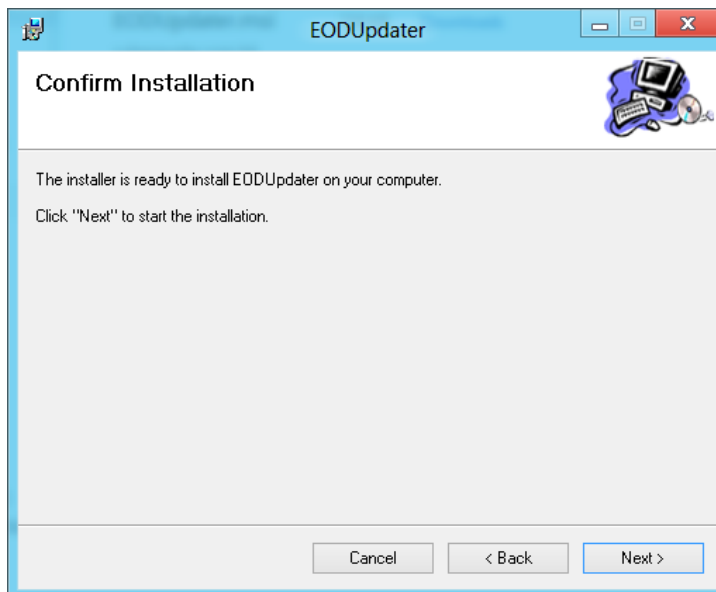

- 2) Click 'Next' when the installation window appears.

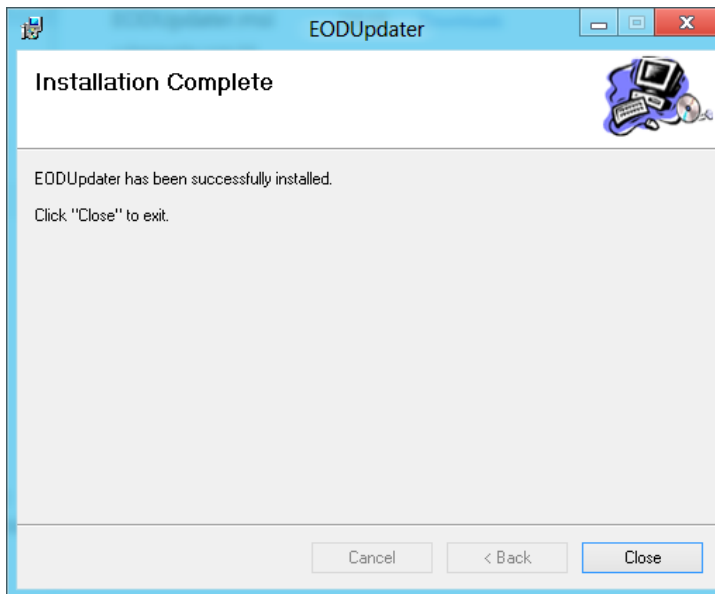

- 3) Choose your desire path to install EODUpdater2, and click 'Next'.

- 4) Click "Next" to confirm the installation °

- 5) Installation Complete wordings would appear after installation, click 'Close' to leave the window.

- 6) After installation you will find an icon of EODUpdater on Desktop.

Update EOD data by EODUpdater

CyberQuote provide two ways to update the newest EOD data. The first one is to download the newest MSDATA to replace the existing one. The second method is to use EOD Updater to update the newest daily file to existing Msdata. (For the second method, please refer P.x)

To update data with the second method, please download the latest EOD text file in CyberQuote website after logged in.

1) Right click on the EODJanxx.txt file and choose 'Save as' to save it in C:\Msdata folder.

[如想補發舊資料，請下載於補發舊資料DIY](#)

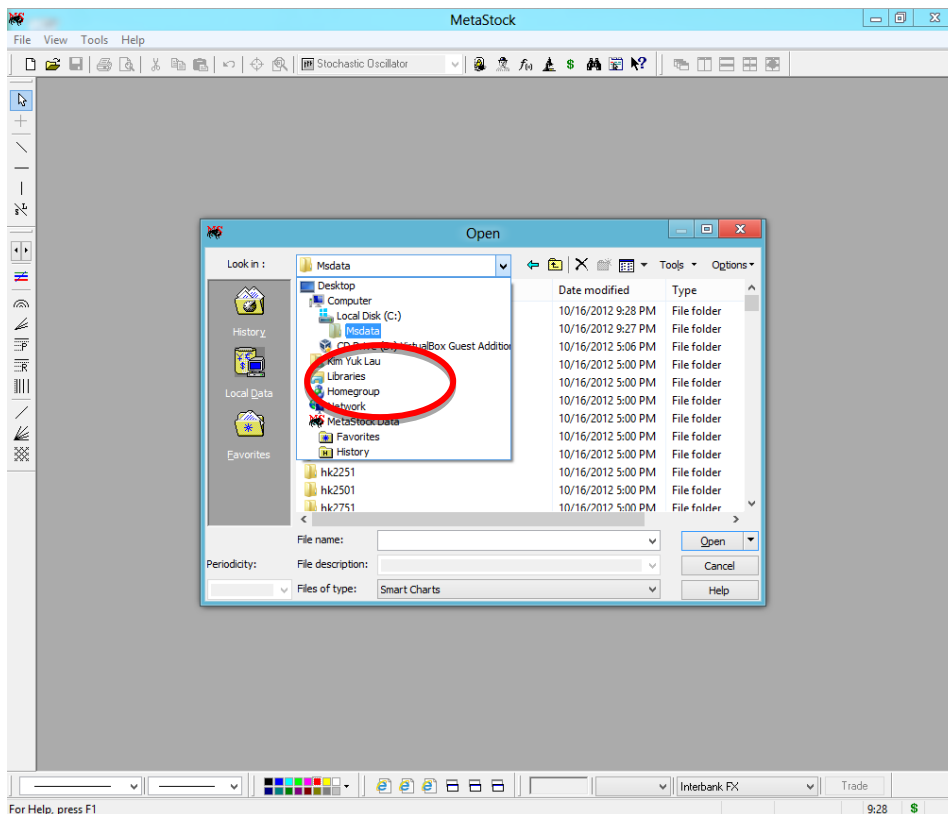

iii. [Updater 使用方法](#)

更新的程序如下:

- 2) Double click on EODUpdater to open it. Click on 'Update Now' to start the updating process. A 'EOD Updated!' alert will appear after it ends. If during the update process EODUpdater shows no response, please be patient until the alert appears. P.S The EODUpdater can update only one text file a time.

- 3) You can now open files in Msdata2 from MetaStock. From MetaStock, click 'File' → 'Open', choose 'C:\' or the folder you chose in step 4 to view all files in Msdata2. Instruments are divided into hkstock and hkindex. Click on the desired stock to open its chart.
